# MODULINE COLORSCREEN FENCING   J

Change in Fence Heights via a sloping panel

Step 1 - Install all your fence frames as per Instruction Sheet A, with the exception that the width of the sloping panel frame is only 2.18m.

Step 2 - Insert all the duopanels as per Instruction Sheet A, bearing in mind that all full length panels have 10 duopanels, but the sloping panel will only have 9 duopanels (7 x standards, 1 x LH and 1 x RH). Support duopanels with the stretchies supplied.
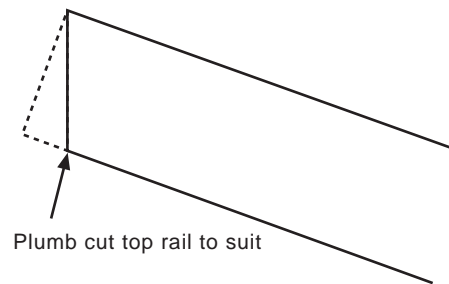

Step 3 - Take a straight edge and a felt tip pen and mark the angle on the fence. Be sure to mark each individual duopanel. these marks will be hidden by the top rail.

Make sure each panel is marked with a felt tip pen.
The line should run from Point A to Point B

Step 4 - Dismantle the sloping panel and cut each individual duopanel with tin snips along the felt tip line.

Step 5 - Re-asemble the cut duopanels and cut a 2.4 top rail to length of slope. Cut the rail with a plumb cut to suit the angle.

Plumb cut top rail to suit

Step 6 - Complete tek screws and fit caps to fence.
