

Racking Fence for a drop of over 500mm in a 2.42m panel

PLEASE NOTE: When cutting Colorsteel use a hacksaw or tin snips. DO NOT USE an angle grinder or abrasive cutoff blades.

You will also require Instruction Sheet L and M for standard Assembly and Installation. DO NOT RACK THE PANEL MORE THAN THE SLOPE REQUIRED.

Step 1 - After you have assembled the panels following Instruction Sheet L, rack section of fence by pushing at the top.

Step 2 - Now remove post from each end.

Step 3 - Using a hacksaw, cut small sections off the rails so that they are plumb as shown on the sketch. You may also need to trim the pool channel to the same length as the rail. Wipe area with a soft cloth.

Step 4 - Refix posts allowing a 6mm gap between the posts and the rails.

Step 5 - Now complete racking of fence to desired angle.
